

Marcus Ortyl

Full-Stack Developer

Bristol, UK | 07496 490651 | marcusortyl@gmail.com

Marcusortyl.dev | marcushenri.studio | github.com/Mortyl

Profile

Full-stack developer with 3+ years' experience building and optimising modern web applications using TypeScript, React, Next.js, Node.js and Python. Proven record of improving performance, enhancing UX, and delivering scalable features across client and product environments.

Core Skills

Frontend: TypeScript, JavaScript, React, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Python, REST APIs, FastAPI, PostgreSQL, Socket.io, Prisma

Tools & Other: Git, GitHub, Vercel, AWS, Jira, LLM integration, OAuth, Agile methodologies

Professional Experience

10/2024 - Present

Freelance Web Developer – *Remote*

- Delivered full-stack web applications for multiple clients using React, Next.js, TypeScript and Node.js, improving scalability and maintainability
- Rebuilt legacy applications with modern frameworks, reducing page load times by 60% and significantly improving UX and SEO performance
- Redesigned and optimised a payment flow, reducing checkout friction and increasing successful transaction completion rates

04/2023 - 04/2024

Application Developer, Illumo Digital – *Bristol*

- Built and delivered production-ready features for a React-based sports-tech platform used in professional rugby and UFC environments
- Improved application performance and stability through targeted bug fixes and optimisations across React and Node.js codebases
- Enhanced mobile usability and responsiveness via React Native improvements

03/2021 - 11/2022

Software Engineer, Brightpearl – *Bristol*

- Developed AWS-based e-commerce platform features within cross-functional agile teams
- Contributed to migration from PHP monolith to Java microservices using Kubernetes
- Reduced production bugs by 20% by improving unit test coverage and enhancing API testing workflows

11/2019 - 01/2021

Application Developer, ALD Automotive – Bristol

- Built and maintained a finance web application using Angular and C# in an agile development team
- Developed reusable frontend components, improving UI consistency and efficiency
- Wrote production SQL queries against live financial databases supporting daily operations

Projects

PoEProfessor – github.com/Mortyl/poe-professor

- Built a full-stack AI build analyser for Path of Exile 2 using Next.js, TypeScript, Python, FastAPI, Anthropic Claude API and OAuth
- Resumable data pipeline scraping and statistically analysing 20,000+ player builds across time-series snapshots
- Knowledge-grounded LLM prompting with co-occurrence detection, verifying AI build guides against real meta-data

TaskFlow – github.com/Mortyl/task-manager

- Built a full-stack real-time collaborative task management application using Next.js, TypeScript and Socket.io
- Implemented live collaboration features including drag-and-drop interactions, activity feeds and multi-user state synchronisation
- Designed secure JWT authentication and an invite-based system enabling team collaboration workflows

Education

2018 - 2019

DevelopMe, Bristol – Web Developer Bootcamp

Intensive training in HTML, CSS, JavaScript, React and React Native

2014 - 2018

University of the West of England, Bristol – BSc Biological Science (2:1)

2014

Sussex Downs College – A-Levels

Computing (A), Business (B), Geography (B)

Interests

Building PCs from scratch, climbing, fitness, board sports and guitar
